

**LIST OF POSTERS**  
**Nanoscience and Nanotechnology**  
**for**  
**Biological/Biomedical/Chemical Sensing**

- P 01 I. L. Chang, Y. C. Chen, National Chung Cheng University, Chia-Yi  
*Is Molecular Statics Method Suitable for the Study of Nanomaterials? The Study Case on Nanowires*
- P 02 G. Baquey, Chamelic Ltd, UK  
K. Sakai, S. Biggs, University of Leeds, UK  
*PH-responsive Self Assemblies for Smart Surface Coating*
- P 03 H. Into, Y. Suto, A. Nakada, H. Kumata, M. Tsuzuki, T. Uchida, Tokyo University of Pharmacy and Life Science, Japan  
*Real-Time Monitoring of Volatile Organic Compounds Using Quartz Crystal Microbalance Coupled with Mesoporous Silica Thin Film*
- P 04 Y. S. Lin, S. H. Wu, Y. Hung, C. Y. Mou, National Taiwan University, Taipei  
*A Facile Synthesis of Monodispersed Luminescent Silica Hollow Nanospheres*
- P 05 Y. Arai, Y. Suto, H. Kumata, M. Tsuzuki, T. Uchida, Tokyo University of Pharmacy and Life Science, Japan  
*Antigen-antibody interactions in Tailor-made Nanostructured Thin film*
- P 06 C. H. Yang, M. J. Syu, National Cheng Kung University, Tainan  
*Electrochemical Sensing of Bilirubin Through Electron-Proton Conducting of the Imprinted Poly(AMPS-co-EGDMA) Chelated With Imidazole*
- P 07 Y. Suto<sup>a</sup>, H. Kumata<sup>a</sup>, T. Noda<sup>b</sup>, M. Tsuzuki<sup>a</sup>, T. Uchida<sup>a</sup>,  
<sup>a</sup> Tokyo University of Pharmacy and Life Science, Japan  
<sup>b</sup> Kanagawa Institute of Technology, Japan  
*Highly Selective Alkali Metal Ion Sensor Based on the Mesoporous Silica Thin Films Incorporating Fluoroionophore*
- P 08 M. Ishihara, Y. Suto, M. Ikeda, H. Kumata, M. Tsuzuki, T. Uchida, Tokyo University of Pharmacy and Life Science, Japan  
*Real-Time Kinetic Analyses for Adsorption/Desorption Processes of Metal Ions in Mesoporous Thin Film Using Quartz Crystal Microbalance*
- P 09 S. P. Song, Shanghai Institute of Applied Physics, Chinese Academy of Sciences, Shanghai  
*Nano-bio Complexes Based on Gold Nanoparticles for Multiplexing DNA Sensor*
- P 10 J. Q. Gu, L. D. Sun, J. Shen, C. H. Yan, Peking University, Beijing  
*High Quantum Yield Biofunctionalized LaPO<sub>4</sub>:Ce, Tb Nanoparticles*

- P 11 X. S. Sun, Z. Yu, H. Chen, Y. Jin, Z. F. Jiao, Z. M. Yang, M. Gong, Y. He, Sichuan University, Sichuan  
J. G. Liu, Optoelectronic Research Institute  
*Growth of Amorphous SiO<sub>2</sub> Nano-wires on Pre-oxidized Silicon Substrate Without Additional Silicon Source via Ni-based Catalyst Assistance*
- P 12 X. S. Sun, Z. Yu, H. Chen, Z. W. Wu, Y. Jin, Z. F. Jiao, Z. M. Yang, M. Gong, Y. He, H. Wang, Sichuan University, Sichuan  
J. G. Liu, Optoelectronic Research Institute  
*High Purity and Large-scale Preparation of  $\alpha$ -Ga<sub>2</sub>O<sub>3</sub> Nanowires and Nanosheets by CVD and Their Raman and Photoluminescence Characteristics*
- P 13 O. Auciello, L. E. Ocola, K. K. Uprety, B. D. Reiss, M. A. Firestone, Argonne National Laboratory, USA  
*Integration of Polarizable Ferroelectric Lead Zirconium Titanate Films with Fluidic Nanochannels for Biologically Functionalized Nanofluidic Devices*
- P 14 Y. F. Qiu, S. H. Yang, The Hong Kong University of Science and Technology, Hong Kong SAR  
*ZnO Nano-tetrapods: Controlled Vapor Phase Synthesis and Novel Application for Humidity Sensing*
- P 15 Q. S. Li, R. Q. Zhang, S. T. Lee, COSDAF, City University of Hong Kong, Hong Kong SAR  
T. A. Niehaus, Th. Frauenheim, University Bremen, Germany  
*Excited State Properties of Silicon Quantum Dots Functionalized with Propionic-Acid*
- P 16 Uiseong Kim, Sehoon Jeon, Wonjin Jeon, Chee Burm Shin, Ajou Univerisity, South Korea  
*Microfluidic Modeling of a Lab-on-a-chip for the Detection of Protein Aggregation*
- P 17 L. S. Huang, Nanjing University & Nanjing University of Technology, Nanjing  
L. Pu, Nanjing University, Nanjing  
S. Wright, EDAX Inc.  
*Characterization of Well-faceted Oxide Nanofibers with Periodic Junctions*
- P 18 X. M. Meng, X. Fan, X. H. Zhang, Technical Institute of Physics and Chemistry, Chinese Academy of Sciences, Beijing  
S. T. Lee, City University of Hong Kong, Hong Kong SAR & Technical Institute of Physics and Chemistry, Chinese Academy of Sciences, Beijing  
*Two-stage-fabrication of SiO<sub>2</sub> Nanotubes*
- P 19 G. W. She, X. H. Zhang, W. S. Shi, X. Fan, Technical Institute of Physics and Chemistry, Chinese Academy of Sciences, Beijing  
C. H. Liu, Tsinghua University, Beijing  
C. S. Lee, S. T. Lee, COSDAF, City University of Hong Kong, Hong Kong SAR  
*Controlled Synthesis and Field Emission Properties of Oriented Single Crystal ZnO Nanotube Arrays on a Transparent Conductive Substrate*

- P 20 W.S. Shi, L.X. Mu, Technical Institute of Physics and Chemistry, Chinese Academy of Sciences, Beijing  
*Silicon Nanowires-based Fluorescence Sensor for Detecting Cu<sup>2+</sup>*
- P 21 C. Y. Zhang, X. H. Zhang, X. J. Zhang, X. Fan, Technical Institute of Physics and Chemistry, Chinese Academy of Sciences, Beijing  
S. T. Lee, COSDAF, City University of Hong Kong, Hong Kong SAR  
*Solvent Evaporation Induced Pattern Growth of Squaraine Dye Nanorods*
- P 22 K. Yang, G. W. She, X. H. Zhang, Technical Institute of Physics and Chemistry, Chinese Academy of Sciences, Beijing  
S. T. Lee, COSDAF, City University of Hong Kong, Hong Kong SAR  
*Zinc Oxide Nanorod Arrays as Biosensors for Ascorbic Acid Detection*
- P 23 M. L. Zhang, N. B. Wong, S. T. Lee, City University of Hong Kong, Hong Kong SAR  
*Highly Sensitive Label-Free Immunoassay with Surface-Enhanced Raman Spectroscopy (SERS)*
- P 24 X. Fan, C. S. Lee, S. T. Lee, COSDAF, City University of Hong Kong  
X. M. Meng, X. H. Zhang, Technical Institute of Physics and Chemistry, Chinese Academy of Sciences, Beijing  
*Synthesis and Characterization of CdSe Nanostructures*
- P 25 C. Wang, Y. Jiang, Hefei University of Technology, Hefei  
W. J. Zhang, S. T. Lee, COSDAF, City University of Hong Kong, Hong Kong SAR  
*Characterization and Synthesis of Highly-Ordered CdS Nanowire Arrays via A Solution Reaction Route*
- P 26 S. Honary, K. Ghagar, Mazandaran University of Medical Sciences, Iran  
P. Khazaeli, Kerman University of Medical Sciences  
*The Effect of Chitosan Molecular Weight on Formation of Silver Nanoparticles*
- P 27 P. C. P. Watts, S. R. P. Silva, University of Surrey, UK  
S. James, M. Ilsley, University of Brighton  
J. K. Irvine, E. T. McAdams, University of Ulster  
S. Dunne, G. Ruffini, Star Lab, Spain  
*Carbon Nanotube Based Electrophysiological Sensors*
- P 28 M. L. Gilchrist, B. He, M. Sharma, City College of New York, USA  
*Biomembrane-Nanostructure Hybrid Systems via Membrane Protein Anchoring*
- P 29 N. Mureau, E. Mendoza, S.R.P. Silva, University of Surrey, UK  
*Dielectrophoretic manipulation of fluorescing Single-Walled Carbon Nanotubes*
- P 30 N. Mureau, P.C.P. Watts, S.R.P. Silva, University of Surrey, UK  
*Optical Absorption to Quantify MWCNT Carboxylate Salts Concentration in Aqueous Solution*

Additions 5/30/07

**L. G. Teoh, A. C. Pan, National Pingtung University of Science and Technology, Pingtung**  
**L. H. Chan, Han Tai Technology Co. Ltd.**  
**T. H. Fang, National Formosa University**  
**Y. C. Shen, Nan-Jeon Institute of Technology**  
**Structural Characterization of Nanostructured Tungsten Oxide Prepared by the Sol-gel Method**

**L. G. Teoh, H. Y. Cheng, National Pingtung University of Science and Technology, Pingtung**  
**L. H. Chan, Han Tai Technology Co. Ltd.**  
**T. H. Fang, National Formosa University**  
**Y. C. Shen, Nan-Jeon Institute of Technology**  
**Synthesis of Nanostructured Mesoporous Titania Prepared by the Sol-gel Method**

**L. G. Teoh, National Pingtung University of Science and Technology, Pingtung**  
**Y. C. Shen, P. C. Chen, Nan-Jeon Institute of Technology**  
**L. H. Chan, Han Tai Technology Co. Ltd.**  
**M. H. Hon, National Cheng Kung University**  
**Nanopores Formation with Organic Electrolyte in n-GaP Anodization**
