Engineering Conferences International (ECI) is a not-for-profit organization that has served the engineering and scientific community for over 55 years by providing a global program of leading-edge conferences.

More than 1500 international conferences have been held, covering a multitude of key topics and designed to be highly cross-disciplinary. A unique characteristic of ECI conferences that ensures relevance is the strong representation from industry, academia and government.

**INTERNATIONAL CONFERENCES
WITH A GLOBAL REACH FOCUSING
ON CUTTING EDGE AND
INTERDISCIPLINARY FACETS OF
ENGINEERING, SCIENCE AND
TECHNOLOGY**

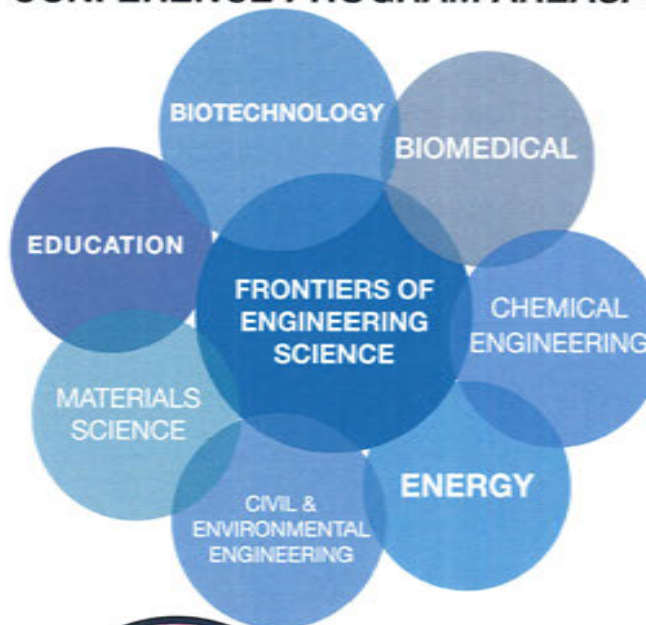

WHY ECI IS THE BEST CHOICE FOR YOUR CONFERENCE

ECI offers comprehensive conference organization services, including:

- A professional, experienced staff and technical liaison from the Conferences Committee
- Seed funding
- All hotel arrangements, all deposits and financial responsibility for the conference
- Maintains website and large mailing list for publicity
- Online abstract submission
- Graduate student fellowships and matching grants for young researchers
- Government grant proposals and assistance with industrial fundraising
- Collecting and distributing external funding without charge
- Maintaining a wide listing of conference venues
- Flexibility in terms of venue and program arrangements
- Produces both bound and electronic program/abstract books
- Provides a platform for electronic proceedings
- Provides staff support at conference

CONFERENCE PROGRAM AREAS:

ECI is recognized for its program of focused international, interdisciplinary conferences on a wide variety of traditional and leading-edge topics in the engineering sciences.

Recent examples include conferences on Geopolymers, Biorefinery, CO₂ Summit, Thermal Barrier Coatings, Syntactic and Composite Foams and Membrane Technology.

ECI conferences in the bioengineering area have helped accelerate the creation of a thriving, worldwide biotechnology industry.

Conferences such as Enzyme Engineering, Cell Culture Engineering, Biochemical Engineering, Vaccine Technology, Integrated Continuous Biomanufacturing, Cell-Based Therapies and Single-Use Technology have been great forums for encouraging innovation, for stimulating ideas, and for networking.
