

## INTEGRATED CONTINUOUS BIOMANUFACTURING AWARD WINNER

**KONSTANTIN B. KONSTANTINOV**

Engineering Conferences International (ECI) is very pleased to announce the creation of an award for the very successful conference series on Integrated Continuous Biomanufacturing (ICB). The first award will be given to **Konstantin Konstantinov** in recognition of his vision and effort to create this conference series and for his multiple contributions to the field. This award will be presented to Konstantin at ICB III.

Konstantin will give a keynote lecture and chair a committee to select future winners of this award.

Konstantin continues to make differentiating contributions to process development and commercialization activities for multiple new products through his over 50 Peer Reviewed publications and his many conference contributions. This activity was recently recognized by the Cell Culture Engineering (CCE) community and Konstantin was selected from many contenders as the 2016 recipient of the Conference award which was presented to him in May at CCE XV in La Quinta, California.

We anticipate that the Integrated Continuous Biomanufacturing Conference will grow in importance over future years.
